B. Clarifications

- a. Snow removal and management in the specific work areas of each contractor will be the responsibility of that subcontractor to manage. Haskell will provide snow removal along City Creek Canyon Road, Trailer Town and staging areas.
- b. Subcontractors are to carry cost to provide engineering and design for deferred submittals as required by the specifications. This includes, but not limited to pipe supports, shoring, seismic supports and restrains, etc.
- c. All subcontractors are required to meet all OSHA safety requirements, including, but not limited to excavation safety and shoring, equipment, fall protection, confined spaces, etc.
- d. Subcontractors with fewer than 5 employees on site are not required to meet the full-time non-working Foreman requirement as outlined in the RFP.

*Please acknowledge you've received this addendum in your proposal.
